## PROJECTS

### Financial Instrument

<https://github.com/Samiksha1495/Financial-Instrument>

Post-Graduation mini-Project

- To develop software for the end-user providing various ways to perform banking tasks from a Centralised location such as deposit, withdraw, fund transfer, admin portal using C++ programming language in the frontend, and .dat file on the backend for data storage.

### Hoopla Shopping Website

<https://github.com/Samiksha1495/Hoopla-Shopping-Site>

Infosys training project

- The project was aimed at user interactive Hoopla Shopping website using HTML5, Bootstrap, Microservices, PrimeNG, MEAN stack. Worked on a user story displaying all the products, search by keywords, filter by categories, view products by clicking any product image, add to cart, login, and sign up page.

### Billing counter management system

Graduation Project

- The project was aimed to implement a billing queue system so as to manage the billing counter rush based on the number of items in the counter queue instead of the number of customers in the queue. The project is implemented using the 'Queue' data structure in C programming language.
